*DEC 2019 Theme: Social Institutions and the Economic  
Performance of Nations: A 21<sup>st</sup> Century Perspective*

The broad theme of DEC 2019 is framed along the lines of the late Douglas North's seminal contributions of the late 20<sup>th</sup> century to address issues arising out of the social and political turbulence affecting the global community in the 21<sup>st</sup> century. The conference will primarily aim to examine how these issues have been affecting the economic performance of nations at micro and macro level. While this is an academic conference it includes sessions with prominent speakers on policy and business issues designed to appeal also to policy makers, business leaders, consultants, and members of the public.
